About

Context:

The cyber threats that we face are not only ever-evolving, they are becoming evermore complex and sophisticated with each passing year, affecting a widening number of organisations and individuals. Over the last two year's alone, the NCSC has reported that the UK faced 1,100 attacks, an average of 10 attacks per week.

The 6th Annual Cyber Security Summit will welcome cyber security and ICT professionals from across central government, local government, law enforcement, the NHS and wider public sector, to tackle key issues at the heart of UK public sector and discover, determine and deliberate the latest developments, strategies and technologies available to successfully defend organisations online.

Join 200+ colleagues and peers, and keep up-to-date with the scale, complexity and ever-changing threat that we face.

The 6th Annual Cyber Security Summit will take place on the 9th July in Central London. **Free-t-attend for the public sector.** [Guarantee your place at the summit by clicking here to register.](#) [1]
